Contents

Number 1

Wu Cheng-jiu, G. Gaida, J. Bialas
Hyperfine Spectrum of a Ro-Vibrational Line of $^{127}I^{129}I$ at 612 nm 1

J. Ancsin
Melting Curves and Heat of Fusion of Indium 7

K. v. Klitzing, G. Ebert
Application of the Quantum Hall Effect in Metrology 11

H. Watanabe, K. Iizuka
The Influence of Dissolved Gases on the Density of Water 19

I. Hirano
Zeeman Splittings of the Excited $6\,^2P_{3/2}$ State of the Caesium Atom 27

P. B. Coates, J. W. Andrews, M. V. Chattle
Measurement of the Difference between IPTS-68 and Thermodynamic Temperature in the Range 457 °C to 630 °C 31

Letter to the Editor

B. N. Taylor
Impact of Quantized Hall Resistance on SI Electrical Units and Fundamental Constants 37

Book Review 41

Number 2

R. C. Kemp, W. R. G. Kemp, P. W. Smart
The Triple Point of Xenon as a Possible Defining Point on an International Temperature Scale 43

F. Bayer-Helms, H. Darnedde, G. Exner
Längenstabilität bei Raumtemperatur von Proben der Glaskeramik „Zerodur" 49

E. J. Axton, A. G. Bardell
Neutron Yield from the Spontaneous Fission of ^{252}Cf ($\bar{\nu}$) 59

H. Preston-Thomas, T. J. Quinn, R. P. Hudson
The International Practical Temperature Scale 75

P. J. Key, N. P. Fox, M. L. Rastello
Oxide-bias Measurements in the Silicon Photodiode Self-calibration Technique 81

P. Giacomo
News from the BIPM 89

Letter to the Editor

M. Tischler, M. Jimenez Rebagliati
Concerning the Thermodynamic Temperatures of the Silver and Gold Points 93

Erratum 97

Number 3

V. G. Pal'chikov, Yu. L. Sokolov, V. P. Yakovlev
Measurement of the Lamb Shift in H, $n=2$ 99

J. B. Patterson, D. B. Prowse
Comparative Measurement of the Density of Mercury 107

B. E. Bernard, L. I. Winkler, R. C. Ritter
Thermal Noise in Precision Rotors 115

W. C. Daywitt
A Derivation for the Noise Temperature of a Horn-type Noise Standard 127

N. García, A. M. Baró, R. Miranda, H. Rohrer, Ch. Gerber, R. Carcía Cantú, J. L. Peña
Surface Roughness Standards, Obtained with the Scanning Tunneling Microscope Operated at Atmospheric Air Pressure 135

R. C. Kemp, L. M. Besley, W. R. G. Kemp
A Reference Function for Platinum Resistance Thermometer Interpolation Between 13.8 K and 273.15 K 139

J. E. Martin, N. P. Fox, P. J. Key
A Cryogenic Radiometer for Absolute Radiometric Measurements 147

Letter to the Editor

J. A. Cogno, M. A. Ezpeleta
Mathematical Models for the Calculation of Power Absorbed by Absolute Radiometers 157

Book Review 161

Forthcoming Conference on Developments in Optical Spectrometry 163

Number 4

A. Hartland, S. Harkness, P. J. Krause, O. P. Galakhova, V. I. Krzhimovskii, I. V. Korotkova
An International Intercomparison of the UK and the USSR Voltage Standards Maintained with Josephson Effect Systems 165

B. Fellmuth, H. Maas, D. Elefant
Investigation of the Superconducting Transition Point of Niobium as a Reference Temperature 169

E. J. Axton, A. G. Bardell, S. J. Felgate, E. M. R. Long
The Ratio of the Thermal Neutron Capture Cross-Sections for Hydrogen and Manganese and its Impact on the Measurement of Neutron Source Emission Rates by Manganese Bath Techniques 181

R. E. White, P. H. Barker, D. M. J. Lovelock
Measurement of Nuclear Reaction Q-values with High Accuracy: $^7Li(p,n)^7Be$ 193

H. Sakurai, R. C. Kemp
Intercomparison of 12 Standard Platinum Resistance Thermometers Between 13.8 K and 273.15 K 201

Zhang Jipei, Robert J. Berry
Ac and Dc Insulation Leakage in Platinum Resistance Thermometers up to 750 °C 207

Announcement 225

Reminder 227
